

Heart Disease Is The Leading Cause Of Death In The United States!

One Out of Every Two People Have Some Form of Heart Disease

Do You Have Heart Disease? You May Have this Disease if You Suffer from any of These Things!

| | | |
|---------------------|--------------------|--------------------|
| High Blood Pressure | Diabetes | Migraine Headaches |
| Chronic Pain | Sexual Dysfunction | Arthritis |
| High Cholesterol | Depression | Fibromyalgia |

Nobel Prize Winner, Dr. Louis Ignarro, discusses the discovery of Nitric Oxide and the many natural solutions that are available to you that may help you prevent and even reverse heart disease.

Dr. J. Joseph Prendergast

The American Diabetes Association has recently named Dr. Prendergast the “Father of The Year” for his remarkable scientific contributions. The ADA has honored Dr. Prendergast specifically for:

1. Clinically testing and documenting the results of more than 6,000 of his own patient base
2. Admitting less than ONE percent of his patients to a hospital in 19 years
3. Not losing ONE patient to Heart Attack or Stroke in 19 years

Dr. Prendergast is Board Certified in Internal Medicine, Endocrinology, and Metabolism and has published over 50 medical articles in JAMA, The New England Journal of Medicine, and Diabetes Care. (Go to EndocrineMetabolic.com for more info)

Dr. Prendergast’s greatest pursuit is to save a million lives through implementation of the BPro Vascular Screening System and our company, Heart Disease Defense, has partnered with him in reaching this goal.

We would like to have a BPro Screening Specialist quickly perform a non-invasive vascular screening to establish the baseline condition of your heart.

Following your screening, we will discuss with you the professional strategies and medical protocols available to you that can immediately and dramatically improve your cardiovascular health and wellness.

Cardio Pulse-Wave

The Newest Technology in Non-Invasive Vascular Screening

ABOUT THE SCREENING

The innovative BPro System with “A-PULSE CASP” software instantly and accurately measures your cardiovascular health.

Measure the Difference

Reliable and Accurate

The BPro Cardio Pulse-Wave Device offers the most advanced technology in the cardio health screening market.

This state-of-the-art equipment, technology and A-PuLSE CASP software is now available to the general public as a means to measure your cardiovascular health.

You can take a quick, non-invasive screening that will immediately give you a baseline of your heart health.

The BPro Cardio Pulse-Wave Device is a revolutionary product that has been patented by HealthSTATS International Pte Ltd.

This technology accurately measures the Central Aortic Systolic Pressure (CASP). CASP is the blood pressure measured at the root of the aorta and the BPro is the only device approved to be used in a common clinical setting.

CASP has been shown in many recent studies as an important determinant for strokes and CVS events. It has been validated via invasive study and achieved an accuracy (co-relation) $r=0.9917$ independently.

A-PULSE CASP is FDA Certified and CE MDD approved. It is also being used currently in large drug trials by Pharmaceutical companies.

The CPW is 99.17% accurate and is shown to be as accurate as the catheter (invasive) method.

This is fantastic news for the general public. Finally, there is an affordable screening that can help you take control of your cardiovascular health!

Did You Know?

Vascular Disease includes any condition that affects your circulatory system. This ranges from diseases of your arteries, veins and lymph vessels to blood disorders that affect circulation. Here are some of the conditions that fall under the category of "Vascular Disease".

| | |
|---------------------------|---------------------------|
| Peripheral Artery Disease | Aneurysm |
| Renal Artery Disease | Raynaud's Phenomenon |
| Buerger's Disease | Peripheral Venous Disease |
| Varicose Veins | Erectile Dysfunction |
| Venous Blood Clots | Many More... |

Healthy arteries are flexible and elastic and blood runs through our veins as if they were lined with Teflon. As we age, this Teflon coating starts to get sticky, like Velcro, and this leads to many health risks.

The BPro measures Central Aortic Systolic Pressure (CASP), which can help your physician identify whether you have potential underlying vascular disease. When arteries stiffen, they are more likely to clog and cause heart attacks and strokes. The BPro provides critical information for you that can help you identify problems before they become life threatening.

About the screening

The BPro Cardio Screen only takes a couple of minutes to perform, it is non-invasive, it is very simple, and completely pain free!

The BPro is placed on your wrist where a laser diode reads and calculates a Wave Form signal that indicates the elasticity of large, small, and peripheral artery walls as well as tests stress, heart rate, and more.

You will be provided a printed copy of the results of your Cardio Screen and your Technician will clearly explain the results and the level of your cardiovascular health.

You will also be taught about some effective natural strategies you can implement that may help you prevent/reverse heart disease, diabetes, and other health issues, drug FREE.

These effective health strategies are the result of 20 years of research and application by Dr. Prendergast in his own medical practice and are now available to you.
